Weekly Homework 6

Ngày 7 tháng 5 năm 2025

1 Hash Table

1.1 Content

The tax code information in this lab is collected from 1250 Vietnam company. You can find it in "MST.txt", which has the content as follow

```
Ten cong ty |MST|Dia chi

CONG TY TNHH BEE VIET NAM|0108927262|So 8 - K8, Khu nha o lien ke trung tam 75, Tong cuc II, Bo Quoc Phong, thon Lai Xa, Xa Kim Chung, Huyen Hoai Duc, Thanh pho Ha Noi

CONG TY CO PHAN THUONG MAI CHAU DUC PHAT|3502406778|So 266 Ap Phuoc Trung, Xa Tam Phuoc, Huyen Long Dien, Tinh Ba Ria - Vung Tau

CONG TY CO PHAN XAY DUNG DAU TU PHAT TRIEN DI SAN SAO VIET|031593809]30/18 Truong Sa, Phuong 17, Quan Binh Thanh, Thanh pho Ho Chi Minh

CONG TY TNHH TY THAN TAN HOANG LONG|0315938109]24/7 Duong Thanh Loc 31, Khu Pho 3C, Phuong Thanh Loc, Quan 12, Thanh pho Ho Chi Minh

CONG TY TNHH NONG NGHIEP CONG NGHE CAO MIEN DONG VIET|3401194911|Thon 5, Xa Tan Phuc, Huyen Ham Tan, Tinh Binh Thuan

CONG TY TNHH XAY DUNG VINH GIA PHAT|3603671412|So 171, Xom 4, Khu 2, Ap Bau Ca, Xa Trung Hoa, Huyen Trang Bom, Tinh Dong Nai

CONG TY TNHH HANN TRANG PHAT|36036713155|To 5, Ap Thanh Binh, Xa Loc An, Huyen Long Thanh, Tinh Dong Nai

CONG TY TNHH HANN TRANG PHAT|36036713155|To 5, Ap Thanh Binh, Xa Loc An, Huyen Long Thanh, Tinh Dong Nai

CONG TY TNHH HHUONG MAI DICH VU THLET BI M.K.K!0315932380|154/1/34 Cong Lo, Phuong 15, Quan Tan Binh, Thanh pho Ho Chi Minh

CONG TY TNHH THUONG MAI DICH VU THLET BI M.K.K!0315932380|154/1/34 Cong Lo, Phuong 15, Quan Tan Binh, Thanh pho Ho Chi Minh

CONG TY TNHH TH - DV - NHA HANH SAN KY QUANG[0315933352|So 526 Duong Pham Van Dong, Phuong 13, Quan Binh Thanh, Thanh pho Ho Chi Minh

CONG TY TNHH TY LY LONG|1201613551|So 170 Nguyen Minh Duong, Ap 1, Xa Dao Thanh, Thanh pho My Tho, Tinh Tien Glang

CONG TY TNHH SONA AGENCY VIET NAM|0108926660|So 333 Bach Mai, Phuong Bach Mai, Quan Hai Ba Trung, Thanh pho Ho Noi
```

in which:

- The first line provides the included information fields.
- For the next lines, each one is the information of 1 company, separated by a straight dash ().

For this lab, students are required to read the info of Companies from the "MST.txt" file into the Company data structure, and store as a hash table.

1.2 Programming

The Company data structure is defined as follow:

```
struct Company
{
          string name;
          string profit_tax;
          string address;
};
```

Fulfill the following requirements:

- 1. Read the companies information from a given file:
 - vector<Company> readCompanyList(string file_name)
 - Input: file_name direction to the input file ("MST.txt" for this lab).
 - Companies list extracted from the file, which has the data type vector<Company>.
- 2. Hash a string (company name) function:
 - long long hashString(string company_name)
 - Input: company_name is the string (company name), that need to be hashed.
 - Output: long long positive integer, result of the hash formula given below.
 - Hash formula:

$$hash(s) = \left(\sum_{i=0}^{n-1} (s[i] \times p^i)\right) \mod m$$

in which:

- s Last 20 characters of the company_name. The whole string is required if its size doesn't exceed 20.
- s[i] ASCII code of the character at position i from s.
- p = 31
- -m = 2000
- 3. The function to create a hash table of size 2000, generated from the Companies list:
 - HashTable* createHashTable(vector<Company> list_company)
 - Input: list_company Companies list extracted from file.
 - Output: Generated hash table.
 - Note: Separate Chaining or Linear Probing.
- 4. Add the info of 1 company into an existed hash table:
 - void insert(HashTable* hash_table, Company company)
 - Input: hash_table Given hash table.
 - company the string name of the company, which need to be hashed.
- 5. Search for company information by its name:
 - Company* search(HashTable* hash_table, string company_name)
 - Input: hash_table Given hash table.
 - company_name the string name of the company, which data is needed.
 - Output: Information of the required company, store as Company data structure. Return NULL if the company cannot be found.

Output specification

Input file The input.txt file should be at the same directory level as a.exe (the executable built from your code).

```
// input.txt
CONG TY TNHH BEE VIET NAM
CONG TY CO PHAN THUONG MAI CHAU DUC PHAT
CONG TY CO PHAN XAY DUNG DAU TU PHAT TRIEN DI SAN SAO VIET
CONG TY TNHH MTV THAN TAN HOANG LONG
CONG TY TNHH NONG NGHIEP CONG NGHE CAO MIEN DONG VIET
```

Output file The output.txt file should be at the same directory level as a.exe (the executable built from your code).

```
// output.txt

CONG TY TNHH BEE VIET NAM|0108927262|So 8 - K8, Khu nha o lien ke trung tam 75, Tong cuc II, Bo Quoc Phong, thon Lai Xa, Xa Kim Chung, Huyen Hoai Duc, Thanh pho Ha Noi CONG TY CO PHAN THUONG MAI CHAU DUC PHAT|3502406778|So 266 Ap Phuoc Trung, Xa Tam Phuoc, Huyen Long Dien, Tinh Ba Ria - Vung Tau

CONG TY CO PHAN XAY DUNG DAU TU PHAT TRIEN DI SAN SAO VIET|0315938079|30/18 Truong Sa, Phuong 17, Quan Binh Thanh, Thanh pho Ho Chi Minh

CONG TY TNHH MTV THAN TAN HOANG LONG|0315938103|2/47 Duong Thanh Loc 31, Khu Pho 3C, Phuong Thanh Loc, Quan 12, Thanh pho Ho Chi Minh

CONG TY TNHH NONG NGHIEP CONG NGHE CAO MIEN DONG VIET|3401194911|Thon 5, Xa Tan Phuc, Huyen Ham Tan, Tinh Binh Thuan
```

Command

```
g++ -std=c++11 *.cpp -o main
./main ./MST.txt ./input.txt ./output.txt
```

- ./MST.txt The file path of the tax information file.
- ./input.txt The file path to the input data.
- ./output.txt The file path to the processed or final output data.

2 Submission Rules

Students must adhere to the following submission guidelines:

1. Students may modify all of the function signatures above as needed. However, they must strictly adhere to the Output Specification and are required to implement the solution using a Hash Table.

Failure to comply with these requirements will result in a score of **zero** for the assignment.

- 2. The submission must be in a **compressed zip file** named MSSV.zip, containing:
 - The required C++ files. (.cpp, .h).
 - A report.pdf file describing the approach used in each solution. The image of GitHub home page to verify code is pushed on GitHub
 - Don't use < bits/stdc + +.h >library
